

Technology-Assisted Services - Informed Consent Addendum

This addendum is <u>an addition to</u> The Vine Wellness Group's general Informed Consent to therapy and related services. Those appropriate clients who wish to receive services by use of **phone**, **video conference**, **email or text** will be subject to agreement to the following: (each adult client must initial after each policy)

Confidentiality when using Technology:

Creating an appropriate and confidential space is essential in any treatment. TVWG providers make all appropriate efforts to ensure your confidentiality as if meeting in person. We strongly encourage clients/interns to **take all reasonable efforts** to ensure confidentiality on your end by choosing a space that is free of distractions (includes but not limited to restricting access in and out of chosen space, phone on Do Not Disturb, quiet location...) and restricts potential eavesdropping of treatment in progress.

I have read and agree to the above policy
Privacy with Personal Health Information and HIPAA:
TVWG has researched and chosen a platform for Tech-Assisted treatment that is HIPAA compliant and protects the PHI of our clients. Communication outside the chosen platform is prohibited in order to comply with the Federal and State requirements for client privacy and protection. TVWG providers will not respond to communication outside the limits of the chosen platform.
I have read and agree to the above policy
Forms and signatures:
All intake paperwork, assessments and additional forms for clients will be sent to the client ahead of the scheduled appointment time for review. However, all paperwork will be signed in the presence of TVWG provider for proof of identity during the scheduled session time. The completed forms can then be scanned and emailed or faxed to TVWG for storing. Signing any forms outside these limits will be void, and new forms completed per policy.
I have read and agree to the above policy

Handling an interruption in technology during services:

If there is an interruption of the session due to WIFI issues/connection, power outage, or other extraneous issues, the therapist will attempt to use other means of communication to continue the session. For example, if meeting by video conferencing and disconnection occurs, the therapist will use a landline or cell phone to call to continue session. TVWG provider and client will agree to the alternate methods ahead of time at the start of the session. In some rare instances, as a last resort the session may be
